BORMA WACHS®
Wood Professional Cosmetics
& Eco-Finishes

Company

We manufacture professional wood cosmetics for an eco-friendly way of life.

For decades BORMA WACHS has been working in the wood care and synthetic surface treatment sector with a sense of responsibility and constant commitment to pursuing three fundamental principles: quality, reliability and flexibility. The dynamism, production capacity, safety and marketability of our products characterise our company profile. As specialists in the professional cosmetics of wood and synthetic surfaces, we offer our customers only the best of the best.

Certifications

Our products and manufacturing cycles are regularly tested and approved by international institutes.

VOC FREE

All Borma Wachs branded products comply with the latest European legislation on emissions of potentially harmful substances into the atmosphere and have total regard for the environment and the health and wellbeing of our workers and our customers. With the new ECO PREMIUM - VOC FREE line we are able to offer an uncompromising range, with 100% natural and biodegradable products, with a VOC content reduced to zero.

IBR CERTIFICATIONS

Borma Wachs products are tested and approved by the Rosenheim Institute for Green Building. The analyses carried out certify our products regarding the content of VOC's, biocides, heavy metals and radioactive material guaranteeing their eco-compatibility with the principles of Green Building. The Company always aims to understand the needs and sensitivity of customers, trying to better interpret the request for sustainable and environmentally friendly treatments coming from the use of renewable raw materials, in order to reduce as much as possible the impact on environment and on the health of users and all stakeholders in our communities.

EN71.III CERTIFICATION

The Danish laboratories of Eurofins have recognised the compliance of Borma Wachs oils with the EN 71- III regulation on the migration of heavy metals harmful to health, ensuring the safety of the treatments to the point of allowing their use for finishing or maintenance of toys for children.

Gilding

Classical, Modern and Industrial Gilding

Classical gilding is a technique and an art. It can be easily defined as “orthodox”, both for strictness of its rules and for sanctity of its traditional application context. At the same time gilding is modern, because gold's beauty cannot be left out of more relevant and unconstrained contemporary rendition.
